Professional Summary

Results-driven Full-Stack & Machine Learning Developer proficient in Python, FastAPI, Next.js, Django, and modern SQL/NoSQL databases. Experienced in developing enterprise portals, scalable REST APIs, and predictive machine learning solutions through practical industry internships at NicheTech, Infolabz, and CreArt Solution.

Education

- Diploma in Information Technology Shree Swaminarayan Engineering College, Gurukul
  CGPA: 7.46 (2020 - 2023)
- Bachelor of Engineering (B.E.) in Information Technology Ahmedabad Institute of Technology (AIT)
  CGPA: 8.26 (2023 - *Presant*)

Technical Skills

- **Programming** : Python, JavaScript, TypeScript, SQL
- **Web & Backend Frameworks:** Next.js, React.js, FastAPI, Django, RESTful APIs, Tailwind CSS
- **Databases:** PostgreSQL, MongoDB, Firebase
- **Libraries** : Numpy, XLRD, Pandas, Matplotlib, Plotly, Streamlit, Open CV, Scikit-learn
- **Supervised Machine Learning** : Machine Learning: Linear Regression, Multiple Linear Regression, Logistic Regression, Decision Tree Classifier, Random Forest, K-Nearest Neighbors (KNN)
- **Unsupervised Machine Learning** : K-Means Clustering, Hierarchical Clustering, DBSCAN
- **NLP** : NLTK, CountVectorizer, TF-IDF, VaderSentiment, N-Grams, Bi-Gram, Tri-Gram
- **Deep Learning** : BERT Model, TensorFlow, Keras
- **LLM & AI Integration** : AI Chaining, Prompt Engineering, Claude API, OpenAI API, Gemini API, REST API Integration
- **Tools & Platforms** : PyCharm, Visual Studio Code (VS Code), Jupyter Notebook (Anaconda), Git, GitHub, Streamlit, Power BI,Postman,Docker (Basics),

Experience

CreArt Solution CreArt

Web Development Intern (Django) Jun - 2025 – July - 2025

- Engineered backend architectures and database models using **Python** and **Django**.
- Implemented secure user authentication, CRUD operations, and customized administrative workflows.
- Collaborated on team version control workflows and deployment tasks using **Git** and **GitHub**.

Infolabz PVT. LTD. Service Infolabz

Data Science Jan - 2026 – May 2026

- Worked on data analysis, data cleaning, and preprocessing using Python, Pandas, and NumPy
- Performed data visualization using Matplotlib and Plotly for business insights
- Developed machine learning models using Scikit-learn for prediction and classification
- Built interactive dashboards using Streamlit for data presentation
- Conducted exploratory data analysis (EDA) to identify patterns and trends in data

NicheTech Computer Solutions NicheTech

Full Stack Developer Intern May - 2026 – Present

- Building responsive, component-driven web interfaces using **Next.js** and **React.js**.
- Developing high-throughput asynchronous REST APIs using **Python (FastAPI)** with secure token based authentication.
- Designing and optimizing relational and document schemas across **PostgreSQL** and **MongoDB**.

Projects

- **Uber Analytics Dashboard** (Python, Pandas, Plotly, Streamlit) : Developed an interactive analytics dashboard for Uber ride trends, revenue analysis, booking insights, and customer data visualization. Uber
- **AI Resume Screening and Ranking System** (Python, Streamlit, Pandas, PyPDF2) : Built an AI-powered resume analyzer to rank candidates and identify skill matches based on job descriptions. Resume
- **Startup Failure Prediction and Risk Evaluation System** (Python, Machine Learning, Streamlit, Scikit-learn) : Developed a machine learning system to predict startup failure probability and evaluate business risk using analytical models.
- **Business Support Group Management Portal** (Next.js, Python, FastAPI, PostgreSQL, REST APIs) : Engineered role-based admin dashboards, automated inquiry routing, and secure tiered membership validation workflows with optimized REST endpoints.

Interests

- Machine Learning Applications
- Data Analytics & Visualization
- AI-based Problem Solving

Additional Languages

- English – Professional Proficiency
- Hindi – Native Proficiency
- Gujarati – Native Proficiency
